

## Note About ADC and WSCC work

In your letter of 27<sup>th</sup> November, in Further Documentation and Evidence, we note *During the hearings a Memorandum of Understanding (MOU) between Arun and WSCC was referred to. However, nothing was submitted and to date there is no such document on the Examination Website. Is the MOU to be published?*

At the hearings, it was confirmed that there was no MOU between Arun and WSCC, hence why they attended the hearings and were part of the support team. Whilst initially we started discussions to undertake an MoU with WSCC but due to the speed with which work was progressing, it was agreed that working collaboratively on the specific elements of work would be more effective. As a result we worked jointly in particular on the Infrastructure Delivery, Transport and Education to ensure that the provision was approved by WSCC. This resulted in a few evidence base documents which are listed below and are also on the ADC website.
